

KAPEG LED DESK LAMP

The KAPEG LED Desk Lamp is an attractive, energy efficient, battery powered, rechargeable wooden lamp which is manufactured from local, sustainable materials. This unique lamp is made in Nepal by local community members who have been trained in these new skills by KAPEG. It provides enough light to read

by, or enough light for general ambient room light whether electricity is available or not. During load-shedding, it is an ideal addition to the household, a superior, more attractive and more reliable alternative to cheap, plastic imported lamps.

18 month warranty provided by KAPEG
